

Being confident of a secure and reliable communication services is essential for every business.

## Today, Internet availability is seen as a primary resource.

For many small and medium enterprises, large companies and public authorities, having a reliable communication is a must. The connectivity availability for sensitive sites, manufacturing plants or financial transactions represents a really crucial resource; terrestrial outages or a not good quality of data and/or voice transmission can seriously impact business causing economic loss.

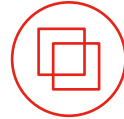

FullSAT is the most secure and reliable satellite professional solution, independent of terrestrial infrastructures. It is quick to activate and guarantees high standards of performance.

## FullSAT allows companies to

### Overcome the Digital Divide

in case of poor or absent terrestrial infrastructures, FullSAT provides a primary Broadband connectivity

### Have Network Backup

the business continuity is guaranteed with any service interruptions

### Be Connected Anywhere

FullSAT provides a secure and reliable connection to Internet anywhere in Europe, North Africa and Middle East. Telespazio can offer you its Autonomous System to access the Internet

### Be Safe

your corporate networks are in the hands of skilled and specialized engineers able to implement your requirements
