 **TELESPAZIO**
a LEONARDO and THALES company

HARNESSING ESA TECHNOLOGY FOR THE BENEFIT OF EUROPEAN MISSIONS

Telespazio's solutions bring together the latest ESA mission operations technology in a platform that's **modern, competitively priced, and fully European.**

TECHNICAL FEATURES

Classic on-premises infrastructure for government and business-critical programmes.

Flexible data model for seamless integration of third-party tools, including AI and automation.

Compatibility with missions using trusted standards: CCSDS, PUS (including PUS-C), and CFDP.

Build for the Future

Extending ESA's PULSE technology, expected to be supported for decades, with no reliance on legacy.

Comprehensive Solutions

Providing a complete control centre solution, from flight dynamics and mission planning to mission control, file-based operations, archiving, and offline analysis.

Trusted Expertise

Mastering the technology with over a decade of support for ESA's development by Telespazio Germany.
